SUMMARY

IT professional and Information Scientist with hands-on experience in system administration, server infrastructure, DNS management, networking, and cloud environments, with additional experience in application development and automation.

EXPERIENCE

Corporate IT Intern (Data & Endpoint Analytics)

Vizient Inc.

June 2026 – August 2026, Centennial, CO

- Analyzed endpoint performance telemetry across the enterprise device fleet in **Nexthink** to identify root causes of degraded device performance.
- **Built scripts and automated remote actions** in the Nexthink platform to remediate endpoint issues, reducing help desk ticket volume.
- **Developed dashboards** surfacing device health and performance trends for IT leadership, turning raw telemetry into actionable reporting.
- Partnered with service desk staff to translate recurring ticket patterns into detection logic and automation targets.

IT Help Desk and A/V Student Technician

University Of Colorado Boulder

February 2025 – April 2026, Boulder, CO

- **Provided technical support** to students, faculty, and staff by troubleshooting hardware, software, and AV systems using **ServiceNow**.
- **Assisted in deploying and maintaining** computer systems, peripherals, and classroom technology across campus.
- **Collaborated** with team members to resolve issues and enhance IT services for the campus community.

Corporate IT Intern (Application Developer)

Vizient Inc.

June 2025 – August 2025, Centennial, CO

- **Engineered full-cycle application development** of the Product Toolbox over a 12-week internship, leveraging Microsoft Power Apps, Power Automate, SQL Server, and SharePoint to streamline process automation.
- Automated **data transfer workflows** between SQL Server and SharePoint using Power Automate, improving efficiency and accuracy.
- Authored **documentation and training materials** to support adoption and maintainability, publishing V1 to the company intranet.

Digital Transformation Intern

MAC Insurance & Financial Services, Inc.

May 2024 – August 2024, Centennial, CO

- **Trained employees** on financial and organizational tools, including E-Money, Redtail, Box, and Nitrogen, improving digital adoption.
- **Assisted in the development and rollout** of a new CRM system to streamline client and data management.
- **Provided technical support** and resources to ensure smooth adaptation to new digital workflows.

EDUCATION

Bachelor of Science in Information Science

Minor in Business • University Of Colorado Boulder • Boulder, CO • December 2026

Bachelor of Science In Commercial Aviation

University Of North Dakota • Grand Forks, ND • 2024

- Earned Private Pilot License at UND; transferred to CU Boulder to pursue B.S. in Information Science

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) – In Progress

PROJECT

Self-Hosted Infrastructure & Personal Website

cole-mclean.com/ • August 2020 – Present

- Designed and operate a self-hosted Ubuntu Linux server running Pterodactyl to host game servers and personal projects, with NGINX.
- Diagnosed and resolved a NAT hairpinning issue preventing internal clients from reaching externally-published services.
- Engineered tunneled ingress using frp to restore inbound connectivity after an ISP migration to CGNAT eliminated public addressing.
- Automated TLS certificate issuance and renewal via Certbot across multiple domains, eliminating manual expiry-driven outages.
- Built and deployed a personal site with Three.js interactive elements on self-hosted Ubuntu infrastructure.

SKILLS

Infrastructure & Systems: Linux (Ubuntu), NGINX, Docker, Network Configuration, DNS & Domain Management, Cloudflare, ServiceNow.

Automation & Scripting: PowerShell, Power Automate, Bash, Git, GitHub Actions.

Development & Data: React, Node.js, Python, Java, Power Apps, SQL, MongoDB, REST APIs, Power BI, Tableau, Azure, Nexthink.
